

Alpha Point Solutions
Company Introduction

Alpha Point Solutions (APS), established in 2007 and based in Singapore's financial hub, is a global, diversified asset manager with specialized expertise across all asset classes and a wide range of strategies to meet clients' needs.

We create tailor-made wealth management plans for our international clientele from individuals, families and corporations, at all levels of experience. We understand that all clients require a unique approach to achieve optimal results. APS work by applying the knowledge and experience of the entire firm to maximize growth appropriate to your personal objectives.

As investors, we draw enormous strength from our long-term commitment to make sustainability the key to the way we operate. And as a community of professionals, we know that our drive to become a more inclusive and diverse organization will also make us more successful than ever.

We set out on this journey with an ambitious vision of the impact that finance can have. Our ambition today is greater than ever. We have more than 450 employees working from a global network of partners & affiliates in Europe, the Americas, the United Arab Emirates and Asia. This allows us to stay close to our clients and companies, wherever they are.

Our ambition is to deliver attractive portfolio performance over the medium- to long-term in order to enable clients to meet their investment goals.

Our investment philosophy is designed in sympathy with this objective:

Alpha Point Solutions
Company Introduction

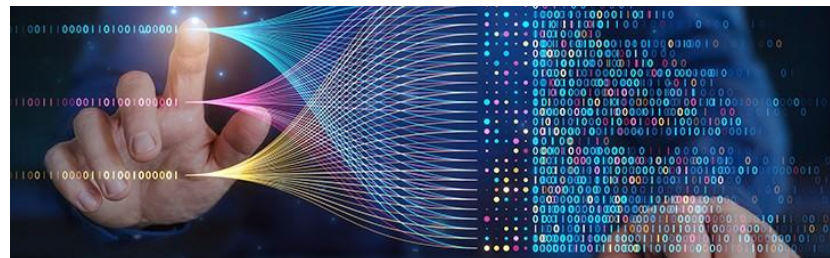

OUR COMMITMENT TO PREMIUM SERVICE

APS places great emphasis on the highest quality client service, rooted in the strong personal relationships we build with our investors. An established Investor Relations department offers best-in-class service for every LP, based on diligence, transparency, and responsiveness. Ardian provides tailor-made solutions and premium service to match each investor's requirements

Customised Solutions

APS is a leading provider of high-quality tailor-made investment solutions for private market asset classes. Our Customized Solutions allow investors to precisely define their investment horizon and targets, and to select the governance structure and service depth that fit their individual needs.

Private Wealth Solutions

Appetite to invest in private markets is growing strongly among private investors. Ardian has always regarded this investor base as an important part of our investor pool and in 2020 launched the Private Wealth Solutions unit to increase focus on private clients and provide them with investment solutions tailored to their needs

At APS we construct portfolios based on our clients' goals, risk appetite, personal and tax circumstances. Our portfolio managers offer both discretionary and advisory investment services.

With our discretionary offering, we invest on behalf of our clients. We draw on proven market expertise to help our clients achieve their financial goals. Our advisory solutions give our clients a two-way relationship with a dedicated banker who liaises with our investment experts. This investment service enables you to be in control but not alone.

INVESTMENT APPROACH

APS's global focus provides more investment opportunities and diversity when compared with managers that focus only on domestic fixed income markets. In addition, global markets provide APS with greater depth and liquidity.

APS draws on a combination of both internal experience and strong relationships with sector specialists. APS identifies global investment opportunities in different credit sectors, then populates those sectors using bottom-up security selection. Key aspects to APS's approach include relative value asset allocation, appropriate diversification and a respect for market liquidity.

ESTABLISHED INVESTMENT FUNDS

APS Pathfinder Fund Presenting an exciting investment opportunity in environmentally sustainable agriculture – a managed fund that combines various high-yielding products such as Asian hardwood plantations (Ebony, Walnut, Teak, and Rosewood) and recyclable bio plantations. These ventures produce plant-based enzymes for animal feed and bioethanol and focus on creating naturally occurring biopolymers. Furthermore, the fund converts agricultural biomass into a carbon-rich liquid, which is then pumped underground to significantly reduce carbon from the atmosphere. Additionally, the funds biomass recycling initiative transforms organic waste into renewable energy, making a substantial contribution to environmental sustainability.

The Pathfinder offers high yield returns through environmentally responsible initiatives. It provides a fixed return of 16.7% per annum with quarterly distribution payments over a 12-month term. The Pathfinder account is popular among our clientele and serves as a starting point for establishing both a strong relationship and financial success. It is the stepping stone to financial freedom.

APS Timber Fund Our vision at APS is to establish the benchmark for excellence in the global timber investment industry. We aim to achieve this by pioneering strategies that combine significant financial returns with unwavering environmental responsibility. Our goal is to lead sustainable forestry practices and illustrate that economic success can indeed coexist with ecological stewardship.

Our mission at APS is to provide investors with exceptional opportunities for financial growth through sustainable timber investments that also support environmental preservation. We strive to integrate practices that enhance biodiversity, reduce carbon footprints, and ensure longevity. By harnessing the potential of renewable timber markets globally, we aim to deliver robust returns while upholding the highest standards of ethics and sustainability. We are committed to expanding our asset base by acquiring high-value timberlands in Asia, with a particular focus on Asian hardwoods such as Walnut, Teak, Agarwood, Rosewood, rubberwood, and Acacia. These trees meet the demand for furniture, construction, marine, and aviation timber. This investment opportunity is for a 5-year term, offering investors a 21% annual return with quarterly distribution payments. There is also an option for renewal at the end of 5 years.

APS Agriculture Fund Investing in APS Agriculture Fund offers an opportunity to invest in biomass recycling facilities in North America and Asia that provide high returns.

These facilities use innovative waste management and energy production methods to promote renewable energy adoption, contribute to waste reduction, and support global efforts towards carbon neutrality. The APS Agriculture Fund focuses on investing in biomass recycling projects that use advanced technology to convert agricultural, forestry, and municipal waste into energy.

These projects not only help reduce greenhouse gas emissions but also generate economic returns through the sale of bioenergy and byproducts. In addition to biomass recycling projects, APS also invests in facilities that produce plant-based proteins and enzyme manufacturing, developing a range of naturally occurring biopolymers, and converting agricultural biomass into a carbon-rich liquid. The investment has a 7-year term with annual returns of 23% and quarterly distribution payments. There is an option to renew the investment at the end of the 7 years.

APS Funds are managed through a limited partnership structure in Singapore, allowing for tax-free distribution of funds. Individual investors are responsible for their own tax obligations in their country of residence. Considering the APS Asian Hardwood Timber Fund and the APS Agriculture Fund for your investment portfolio is valuable.

These investments not only offer financial gain but also align with environmental stewardship and responsibility. By investing with APS, you become part of a community dedicated to creating a healthier planet and achieving extraordinary results for a brighter tomorrow.

THE WORLD OF IPO INVESTMENTS SET TO RETURN

Early Access to Growth:
 Investors participating in IPOs gain early access to companies on the brink of significant growth. This offers them a chance to ride the wave of success from the early stages of a company's public presence."

Potential for Significant Returns:
 Historically, successful IPO investments have delivered substantial returns. As companies go public and garner attention, their valuations can experience remarkable appreciation, translating to significant returns for early investors.

Diversification of Portfolio:
 Including IPOs in your investment portfolio adds diversity by incorporating new sectors, industries, and innovative companies, enhancing potential returns and reducing overall portfolio risk.

Join us in exploring the future of investing:

Embrace the excitement of investing in IPOs with Alpha Point Solutions. Our commitment to delivering value and identifying transformative opportunities sets us apart in the dynamic world of finance.
